RLadies+

Branding guidelines

Type

Font

The main font to be used in all text is **Poppins**.

This font is accessible, modern, flexible in use, and openly accessible via Google fonts. You can access, download and install the font in any computer.

Poppins

Download this font here.

Line Spacing

For accessibility, make sure the line spacing of all text is **at least 1.5 pt.**

Main Title

Heading 1

Heading 2

Heading 3

Lorem ipsum dolor sit amet, consectetuer adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud

Main titles: Poppins Medium

Headings: Poppins Semibold

Main text: Poppins Regular

Emphasis in main text: Poppins Bold (avoid Italics or Underlined text)

Visual Hierarchy

For easy of readability, make sure that the **text elements are sized following a visual hierarchy**.

For example, the Main title should be the largest text, Headings should be sized according to their hierarchy, and the main text should be the same size throughout your document/slide show/webpage.

Accessibility

Text

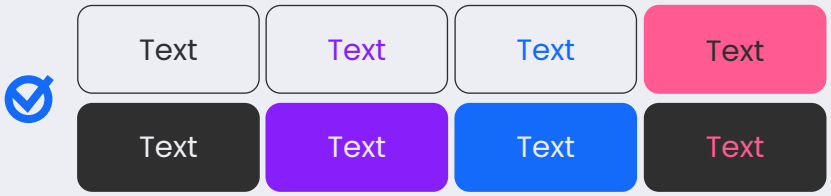

Underlined, italics and all-caps text is not accessible. We recommend the use of **Bold type for emphasis**.

Make sure you **left-align your text**.

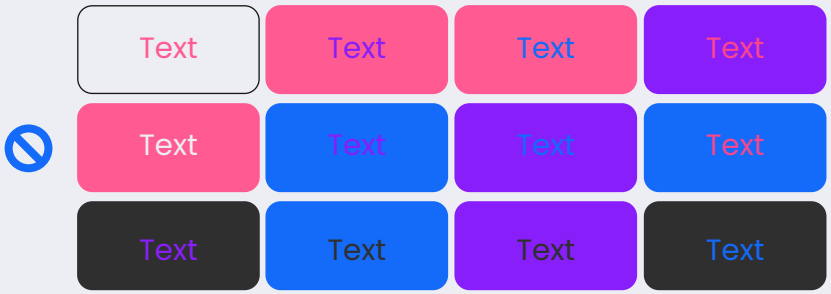

Text should be **large enough to read**. As a rough rule, never use text smaller than 6 points.

Text must always have **high contrast** with its background. Also note that **the smaller the text, the higher the contrast it needs to have with its background**. There are many online tools to help you check, e.g. colourcontrast.cc

Here are some good colour combinations:

Please always **avoid low contrast combinations like:**

Colour Palette

The use of these colours following the guidelines explained in this document ensures that all material produced will be accessible, cohesive, and in line with the RLadies+ branding.

Main Colour

Blue Violet

#881ef9

Accent Colours

Dodger Blue

#146af9

Brilliant Rose

#ff5b92

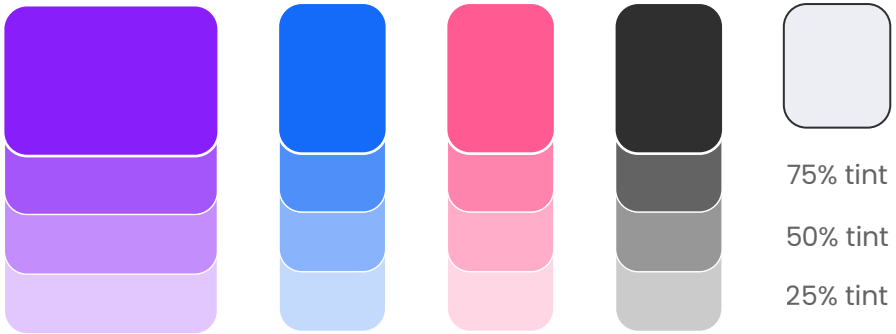

Basic Colours

Bastille Black

#2f2f30

Lavender White

#ededf4

The main colour should be used primarily, and in combination with the basic colours, and/or the accent colours.

The accent colours should be used sparingly, as they are supplementary to the main colour.

The basic colours can be used for the background and main text elements. Use these colours instead of pure white (#ffffff) or pure black (#000000).

Accessibility

Logo

The accessibility principles for the text also apply to the logo. **All elements of the logo should contrast enough with the background**.

We provide many variations of the logo, as well as editable files for maximum flexibility of use.

This allows you to change the colour of parts of the logo (e.g. highlight the + or the L), or add a picture/gradient in the logo icon.

In those case, you need to make sure that **all parts contrast enough** with their background. For example:

Do's

When the background is white or off-white, you can use:

When the background is black or very dark, you can use:

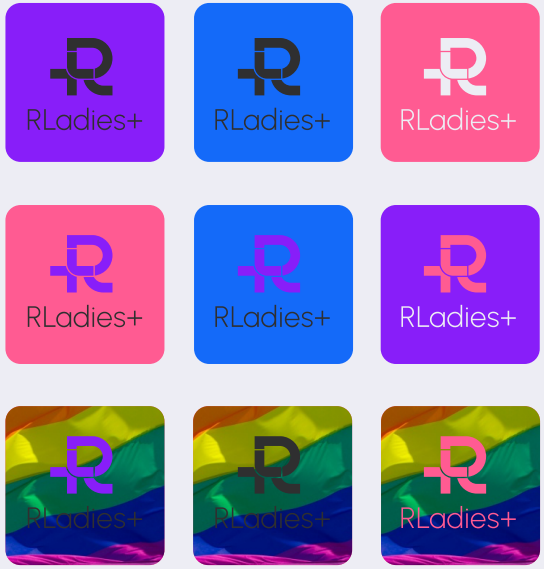

For coloured backgrounds backgrounds, you can use the Lavender-white or Bastille-black version of the logo (whichever contrasts enough with the background):

Dont's

Please avoid using less contrasting combinations:

We offer the logo in many formats. We recommend you use any of the **vector files** (pdf, svg). These are **fully editable** in software like Affinity or Illustrator. These file types can also be **scaled indefinitelly** without losing their resolution.

Use & Positioning

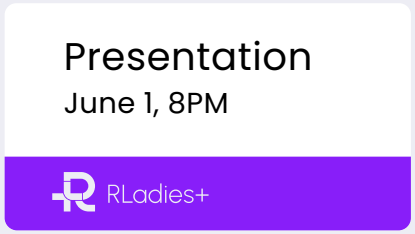

Do's

For most cases, we suggest you use the vertical logo.

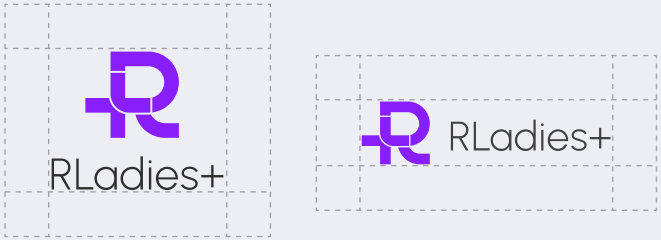

RLadies+

If vertical space is limited, please use the horizontal logo:

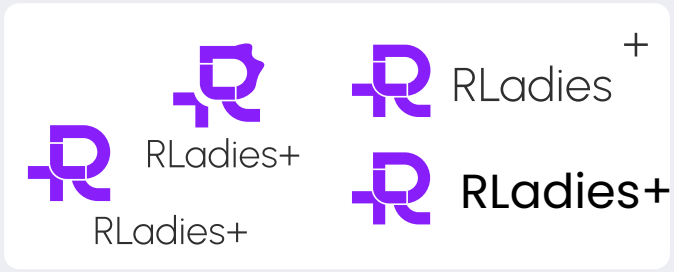

RLadies+

Make sure you leave enough space around the logo and text.

Dont's

Don't edit the shapes, move the logo icon compared to its text, nor recreate the logo using a different font.

Don't change the logo's proportions (rotate, skew, stretch etc.).

Don't position the logo and text in a busy or discontinuous background.

The branding guidelines are already integrated in the slidedeck and social media post/banner templates.

You can access all templates, manuals, logo files and other assets from the RLadies+ branding folder via **the following link**:
